

Testimonials from English Users of the Canny Collar

"I am writing regarding a quite recent purchase of a canny collar. We have a female Springer Spaniel Jessie aged 2. She has always been full of energy and very excitable and although not a very big dog, she is unbelievably strong. We have tried everything to try to control her when taking her for a walk. We took her to training classes, bought a harness for her and tried a choker chain as a last resort (which I hated using, I think they are very cruel way to control a dog). After being at a show in Abergavenny and seeing a dog display team that we decided to ask them if they had any suggestions for us. The lady we asked immediately went to get her dog to show us the canny collar. She said she had two large German shepherds and using the canny collars she could control both of them on a walk. The next day I ordered the collar. I have to say we were absolutely amazed at the results. From the moment we put it on her she stopped pulling completely. My mother is really pleased as she can now take Jessie for a walk (she had to stop due to Jessie's immense strength). Even my nephew who is seven could take Jessie for a walk the following day. We can literally hold the lead with one finger - it's unbelievable! When my parents are out if they see a dog pulling they always tell the owner about the canny collar. We would like to say a big thank you to whoever invented this product and for saving the wear on our arms!!"

"I have just purchased one of your canny collars and would just like to congratulate you on a fantastic product, I have an 11 month old golden retriever who used to pull all the time, the first time we used it, it completely transformed her and now dog walking as a much more enjoyable experience!"

"Just wanted to say what a wonderful product the canny collar is! I have a 2 year old Springer spaniel and had tried everything to stop her pulling on the lead, and it had got to the stage I dreaded taking her out. Now, she doesn't know what has hit her, back to getting walked for miles at a time as she is a joy to walk!! I can even alternate the days that she needs to have the nose strap on. I have a 6 month old springer pup now and she will be getting her own canny collar eventually as well! I recommend this collar to all my doggy friends!! Many thanks."

"We just had to write to say how much we thank you for the Canny collar. we have a 11month border collie. because due to an accident I was unable to walk him on a lead for a while, he got out of the habit, so a much bigger & heavier dog was hard to walk, we tried many advertised harnesses etc., but on seeing your product in a dog magazine we sent off for it, best thing we ever did, it`s like walking a different dog, instead of a chore it`s now a pleasure to walk him, he took to it much quicker as well,

so on behalf of my husband & myself, once again thank you, we are telling all our friends about it, some have remarked on how much better he is.”

“We have an 11 month old yellow Lab bitch who is a delight to be with except when she’s on a lead. She’s passed her obedience classes with flying colours (and starts more advanced classes next month) but nothing we do has persuaded her not to pull. As for a Halti.....forget it.....walks on the lead became ten times worse!!! In fairness, 98% of Katie’s exercise is done off the lead because we live in the Isle of Man and we have plenty of country and forest areas on the doorstep where she can run free. So, I was in the pet shop last week buying a harness in the hope that one might help and I happened to mention to the proprietor about the problem. He immediately produced a Canny Collar and suggested that I try it out. He’d only just got a few in to try them out after a request from another customer so he wasn’t able to give any feedback on success rates. I was prepared to try anything, though I didn’t hold out much hope that the Canny would be any more successful than the Halti. How wrong I was! It was easy to put on (though slightly larger D rings would be of benefit to older folk such as my wife and me) and Katie took to it virtually immediately. To walk with a loose lead was virtually unheard of until last week and my wife and other members of the family have now been taking the dog out for extra walks without fear of being pulled over, so both dog and family have benefited. Now, I am the world’s most cynical person when it comes to reading testimonials on web sites or in advertising literature, but I have to say that everything that I have seen on yours is absolutely true so far as my experience is concerned. A fantastic product which has taken a worry out of our lives. Well done and ‘Thank You’”

“Who says 'you can't teach an old dog new tricks?' Our 6 years old Cairn was a nightmare to walk and having tried harnesses and other nose collars I came across Canny Collar whilst browsing the net. The very first walk using the canny collar was a joy; no pulling and no trying to paw it off. One happy dog and one even happier owner. I was so impressed I have ordered another canny collar for my year old Cairn. May I also congratulate you, the service I received was second to none and I was amazed at the speed with which I received my order. Many thanks.”

“We have a 2 year old rescue dog, Prince. He looks just like one of the dogs on your website video. He has always been a handful on the lead and is so strong I am unable to actually hold him on a walk. We have tried a halti, gentle leader and even a spray collar to stop him pulling but all to no avail. We received our Canny Collar on Wednesday and the transformation is a miracle. My husband and I are very pleased with the result and I can now actually hold the lead on a walk and remain upright! My friend who has an unruly Great Dane is now also sending for a Canny Collar because of my recommendation.”

"I JUST DONT BELIEVE IT ! My Canny Collar arrived today, very speedy service I might add and I have a new dog ! I took George my rescue (hyperactive) greyhound for a WALK, yes a WALK, not a drag, not a battle, not a race, but a controlled steady heeled walk. I have arthritis in my hands and have many products to help me, but this one is the best I have purchased by far, well worth every penny. I am totally amazed at your product, I didn't even believe the videos on your website till I actually walked my dog tonight. Truly amazing, THANK YOU so much, I will be telling all my friends!"

"Our dog Scooter, a 60 pound mostly yellow lab used to pull so hard on walks that I couldn't let my children walk her. If another dog or other animal came by, it was hard even for me to control her! We got her at the pound and she's very well mannered indoors, but not outside. I simply could not believe it when I walked her for the first time using the Canny Collar! There was no pulling! And when we came upon two other dogs being walked, she whined but just kept going! As we have kept using it, she has gotten used to the collar and tries less and less to get the muzzle part off. The Canny Collar has enabled my children to have the leash all by themselves and we all now enjoy taking Scooter for a walk. Thank you for making this product affordable and available."

"I have two Golden Retrievers Mother (Penny) and Daughter (Sandy), I just couldn't walk them even a few yards together, it hurt my hand so much, even with gloves they were just too strong, it was dangerous. Therefore I have had to walk them separately. However I had brought a Canny Collar a few months ago thinking it would be ok if even one dog was behaving - but no that was a mistake. I tried the collar out on both dogs separately and it worked well, but together one with and one without, just wasn't compatible, so I ordered another one. Anyway as soon as the postman delivered the second collar this morning, I put the collars on both dogs and I really didn't expect, to have a '**life changing experience**' today, but I can honestly say that that is what happened. We got out the door, went a few yards down the lane, and hey everything was ok, both dogs walking closely together, and **NO PULLING**, I thought this is too good to be true, it won't last. However I continued the walk and we had an uneventful , very pleasant walk for a hour. I had always imagined walking the two dogs together like this, but for the last eighteen months, I just assumed it was an impossible dream. You just cannot imagine how pleased I am, and nobody said to me 'who's taking who for a walk' The instructions for walking two dogs together were simple and easy to understand and worked perfectly. It was highly recommended to me by the owners of one of Penny's puppies, who are very careful about their dog and would use nothing remotely unkind, and I will certainly be recommending the Canny Collar to everyone I know with a dog that pulls."
