

There's a name for dogs without fast-acting protection against hungry parasites.

Get a \$25 VectraPet™ check when you buy year-round protection. Only at your veterinarian. Learn more at www.vectrapet.com.

Vectra 3D® repels and kills six hungry parasites: *fleas, ticks, mosquitoes, mites, lice and sand flies*. By killing these vectors before they bite and feed, Vectra 3D helps to reduce the risk of disease transmission. It also prevents flea infestations by controlling all stages of fleas. You don't get this kind of protection in other products. Ask your veterinarian about keeping your dog off the dinner menu with Vectra 3D.

Please don't feed the parasites.

There's a name for cats without fast-acting protection against hungry fleas.

Get a \$25 VectraPet™ check when you buy year-round protection. Only at your veterinarian. Learn more at www.vectrapet.com.

Vectra® provides complete flea control by protecting your cat against all stages of fleas. It rapidly kills adult fleas on contact so they don't have to bite to die. This quick action helps reduce the risk of disease transmission. Applying it once a month with the patented applicator also prevents fleas from infesting your home. Ask your veterinarian about keeping your cat off the lunch menu with Vectra.

Please don't feed the parasites.
